find (Windows), a command on DOS/Windows
platforms 30bbf71750 In August 2013, the
initial service only allowed Android devices to
be found. In April 2024 an expanded Find My
Device network launched, enabling the
crowdsourcing of data from Android phones &
tablets to assist in finding other devices on the
network via Bluetooth. This has allowed for
offline finding, as well as support for more
items on the service, such as tracker tags
initially from Chipolo and Pebblebee. These
trackers are marked as supporting Google's
Find My Device network via a badge on their
product marketing. The Find My Device
network was announced in Google I/O 2023, to
be released in July in the same year, before
being delayed awaiting a new industry
specification aimed to prevent unwanted
tracking. A draft of this specification was
released in December 2023, and has been
implemented in iOS 17.5. 30bbf71750 ==
