Flipped classroom the "learning guide" link provided in the teaching module was necessary for performing well in the course From these specific statistics, it can be determined A flipped classroom is an instructional strategy and a type of blended learning. With a flipped classroom, students watch online lectures, collaborate in online discussions, or carry out research at home, while actively engaging concepts in the classroom with a mentor's guidance. It aims to increase student engagement and learning by having pupils complete readings at home, and work on live problem-solving during class time. This pedagogical style moves activities, including those that may have traditionally been considered homework, into the classroom 34e1c14076

Modular building Modularity involves constructing sections away from the building site, then delivering them to the intended site. The inter-connections tie the individual modules together to form the overall building structure. The modules can be placed side-by-side, end-to-end, or stacked, allowing for a variety of configurations and styles. After placement, the modules are joined together using inter-module connections, also known as inter-connections. Modularity involves constructing sections away from the building site A modular building is a prefabricated building that consists of repeated sections called modules. Prefabricated sections are sometimes placed using a crane. Installation of the prefabricated sections is completed on site. is a prefabricated building that consists of repeated sections called modules

The station is divided into two main sections: the Russian Orbital Segment (ROS), developed by Roscosmos, and the US Orbital Segment (USOS), built by NASA, ESA, JAXA, and CSA. A striking feature of the ISS is the Integrated Truss Structure, which connects the station's vast system of solar panels and radiators to its pressurized modules. These modules support...
