Horse are names for different physical, occupational, and speech therapy treatment strategies that use equine movement. The horse has evolved over the past 45 to 55 million years from a small multi-toed creature, Eohippus, into the large, single-toed animal of today. These feral populations are not true wild horses, which are horses that have never been domesticated. It belongs to the taxonomic family Equidae and is one of two extant subspecies of *Equus ferus*. Horses in the subspecies *caballus* are domesticated, although some domesticated populations live in the wild as feral horses. In hippotherapy, a therapist uses the The horse (*Equus ferus caballus*) is a domesticated, one-toed, hoofed mammal. There is an extensive, specialized vocabulary used to describe equine-related concepts, covering everything from anatomy. Humans began domesticating horses around 4000 BCE in Central Asia, and their domestication is believed to have been widespread by 3000 BCE c79bbd8120

Sociology Some of the major topics in this field are social inequality, group dynamics, prejudice, aggression, social perception, group behaviour, social change Sociology is the scientific study of human society that focuses on society, human social behavior, patterns of social relationships, social interaction, and aspects of culture associated with everyday life. The term sociology was coined in the late 18th century to describe the scientific study of society. Sociological subject matter ranges from micro-level analyses of individual interaction and agency to macro-level analyses of social systems and social structure. Regarded as a part of both the social sciences and humanities, sociology uses various methods of empirical investigation and critical analysis to develop a body of knowledge about social order and social change. Applied sociological research may be applied directly to social policy and welfare, whereas theoretical approaches may focus c79bbd8120
