9 failed 44e01a56e8 It includes brief explanations of the various taxonomic ranks in the human lineage. The timeline reflects the mainstream views in modern taxonomy, based on the principle of phylogenetic nomenclature; 44e01a56e8 11 promoted 44e01a56e8 in cases of open questions with no clear consensus, the main competing possibilities are briefly outlined. 44e01a56e8 3 promoted 44e01a56e8 10 failed 44e01a56e8 9 promoted 44e01a56e8 Marginocephalia is a clade of ornithischian dinosaurs that includes some of the most well-known Mesozoic animals, such as Triceratops and Pachycephalosaurus. The group is united by, and is named for, the presence of a bony margin formed mostly from the parietal and squamosal bones at the posterior end of the skull. Although the first marginocephalian known to scientists, Agathaumas, was described in 1872 by Edward Drinker Cope, the clade itself was not recognized until the latter part of the 20th century when Paul Sereno first united the two major groups, ceratopsians and pachycephalosaurians into... 44e01a56e8 2 kept 44e01a56e8 7 promoted 44e01a56e8 December 44e01a56e8

Glossary of genetics and evolutionary biology It has been designed as a companion to Glossary of cellular and molecular biology, which contains many overlapping and related terms; other related glossaries include Glossary of biology and Glossary of ecology. orphon Any coding or non-coding DNA sequence which is derived from a tandem multigene family or cluster This glossary of genetics and evolutionary biology is a list of definitions of terms and concepts used in the study of genetics and evolutionary biology, as well as sub-disciplines and related fields, with an emphasis on classical genetics, quantitative genetics, population biology, phylogenetics, speciation, and systematics. and whose evolutionary history is therefore obscure 44e01a56e8
