History of electromagnetic theory The history of electromagnetic theory begins with ancient measures to understand atmospheric electricity, in particular lightning. solution for this problem known at the time, it appeared that a fundamental incompatibility existed between special relativity and quantum mechanics. People then had little understanding of electricity, and were unable to explain the phenomena. Scientific understanding and research into the nature of electricity grew throughout the eighteenth and nineteenth centuries through the work of researchers such as André-Marie Ampère, Charles-Augustin de Coulomb, Michael Faraday, Carl Friedrich Gauss and James Clerk Maxwell f4e93d43c3

Italian people – living in the Italic peninsula or abroad – have been throughout history the source of important inventions and innovations in the fields of writing, calendar, mechanical and civil engineering, musical notation, celestial observation, perspective, warfare, long distance communication, storage and production of energy, modern medicine, polymerization and information technology. f4e93d43c3

History of mathematics Before the modern age and worldwide spread of knowledge, written examples of new mathematical developments have come to light only in a few locales. From 3000 BC the Mesopotamian states of Sumer, Akkad and Assyria, followed closely by Ancient Egypt and the Levantine state of Ebla began using arithmetic, algebra and geometry for taxation, commerce, trade, and in astronomy, to record time and formulate calendars. Gerolamo Cardano published them in his 1545 book Ars Magna, together with a solution for the quartic equations The history of mathematics deals with the origin of discoveries in mathematics and the mathematical methods and notation of the past. Tartaglia discovered solutions for cubic equations f4e93d43c3
