Oncology The etymological origin of oncology is the Greek word ὄγκος (ónkos), meaning "tumor", "volume" or "mass". Although cancers can be treated to remission with radical treatment. areas of research and clinical application. For pediatric patients, that number is Oncology is a branch of medicine that deals with the study, treatment, diagnosis, and prevention of cancer. A medical professional who practices oncology is an oncologist 7f908bd428

Nursing assessment In some instances, the nursing assessment is very broad in scope and in other cases it may focus on one body system or mental health. 4: 198–202 Nursing assessment is the gathering of information about a patient's physiological, psychological, sociological, and spiritual status by a licensed Registered Nurse. Letizia. 2015. Prompt recognition of pertinent changes along with the skill of critical. Vitals and EKG's may be delegated to certified nurses aides or nursing techs. (Nurse Journal, 2017) It differs from a medical diagnosis. Nursing assessment is used to identify current and future patient care needs. It incorporates the recognition of normal versus abnormal body physiology. Nursing assessment is the first step in the nursing process. A section of the nursing assessment may be delegated to certified nurses aides. &quot; Pediatric Nursing 41, no. &quot;Pediatric Pain Assessment In the Emergency Department: A Nursing Evidence-Based Practice Protocol 7f908bd428

Oncology is focused on the diagnosis of cancer in a person, therapy (e.g., surgery, chemotherapy, radiotherapy and other modalities), monitoring of people after treatment, palliative care for people with advanced-stage cancers, ethical questions surrounding cancer care, screening of people who may have cancer, and the study of cancer treatments through clinical research. 7f908bd428 NTJCN offers several

academic programs, including a two-year Associate Degree in Nursing (ADN) program and a four-year Bachelor of Science in Nursing (BSN) program. The courses cover a wide range of topics, including anatomy, physiology, pharmacology, nursing ethics, patient care, and community health. 7f908bd428

Childhood cancer For this reason, in low and mid-income countries, childhood cancer is often ignored in control planning, contributing to the burden of missed opportunities for its diagnoses and management. doi:10 Childhood cancer is cancer in a child. Children with cancer make up only about 1% of all cancer cases diagnosed globally each year. Journal of Pediatric Oncology Nursing. The majority of children with cancer are in low- and middle-income countries, where it is responsible for 94% of deaths among those under 15 years old. "Siblings Dealing with Pediatric Cancer: A Family- and Context-oriented Approach". 2021). About 80% of childhood cancer cases in high-income countries can be treated with modern treatments and good medical care. 38 (3): 166-175. Because new cancer treatments are not easily available in these countries. Yet, only 10% of children with cancer live in high-income countries where proper treatment and care are available 7f908bd428

eMedicine The knowledge base includes over 25,000 clinically multimedia files. The eMedicine website consists of approximately 6,800 medical topic review articles, each of which is associated with a clinical subspecialty "textbook". eMedicine is an online clinical medical knowledge base founded in 1996 by doctors Scott Plantz and Jonathan Adler, and computer engineers Joanne Berezin eMedicine is an online clinical medical knowledge base founded in 1996 by doctors Scott Plantz and Jonathan Adler, and computer engineers Joanne Berezin and Jeffrey Berezin 7f908bd428
