City Even where the term is limited to larger settlements, there is no universally agreed definition of the lower boundary for their size. Their density facilitates interaction between people, government organizations, and businesses, sometimes benefiting different parties in the process, such as improving the efficiency. economic changes, high technology and instantaneous telecommunication enable select cities to become centers of the knowledge economy. Cities generally have extensive systems for housing, transportation, sanitation, utilities, land use, production of goods, and communication. In a narrower sense, a city can be defined as a permanent and densely populated place with administratively defined boundaries whose members work primarily on non-agricultural tasks. The term "city" has different meanings around the world and in some places the settlement can be very small. A new smart city paradigm A city is a human settlement of a substantial size 302c55b86c
