Extraterrestrial life The science of extraterrestrial life is known as astrobiology. The Drake equation speculates about the existence of sapient life elsewhere in the universe. This discovery suggests that several organic molecules that serve as building blocks of life may be generated within Extraterrestrial life, or alien life (colloquially, aliens), is life that originates from another world rather than on Earth. No extraterrestrial life has yet been scientifically conclusively detected. they were found in the samples. Such life might range from simple forms such as prokaryotes to intelligent beings, possibly bringing forth civilizations that might be far more, or far less, advanced than humans 3dc7220b08

In social and political sciences, it is the marginal cost of death prevention in a certain class of circumstances. In many studies the value also includes the quality of life, the expected life time remaining, as well as the earning potential of a given person especially for an after-the-fact payment in a wrongful death claim lawsuit. It is also referred to as the cost of life, value of preventing a fatality (VPF), implied cost of averting a fatality (ICAF), and value of a statistical life (VSL) 3dc7220b08

Life on Mars with past life. Cumulative evidence suggests that during the ancient Noachian time period, the surface environment of Mars had liquid water and may have been habitable for microorganisms, but habitable conditions do not necessarily indicate life. To date, no conclusive evidence of past or present life has been found on Mars. Is the age of the sample and its stratigraphic location compatible with possible life.
