Topology optimization ; Frecker, M. Vol. doi:10. Topology optimization is different from shape optimization and sizing optimization in the sense that the design can attain any shape within the design space, instead of dealing with predefined configurations. 1007/1-4020-4752-5_24. ; Balaji, R. ; Mockensturm, E. Mahdavi, A. M. 137. (2006) Topology optimization is a mathematical method that optimizes material layout within a given design space, for a given set of loads, boundary conditions and constraints with the goal of maximizing the performance of the system. 239-248. Perfect hash function In mathematical terms, it is an injective function. 1884, MR 0819156, S2CID 5399743 Lu, Yi; Prabhakar, Balaji; Bonomi In computer science, a perfect hash function h for a set S is a hash function that maps distinct elements in S to a set of m integers, with no collisions. 1145/828. with $O(1)$ Worst Case Access Time";, Journal of the ACM, 31 (3): 538, doi:10 5a9b40cd19

Perfect hash functions may be used to implement a lookup table with constant worst-case access time. A perfect hash function can, as any hash function, be used to implement hash tables, with the advantage that no collision resolution has to be implemented. In addition, if the keys are not in the data and if it is known that queried keys will be valid, then the keys do not need to be stored in the lookup table, saving space. 5a9b40cd19

The conventional topology optimization formulation uses a finite element method (FEM) to evaluate the design performance. The design is optimized using either gradient-based mathematical programming techniques such as the optimality criteria algorithm and the method of moving asymptotes or non gradient-based algorithms such as genetic algorithms. 5a9b40cd19
