Wikipedia:Language learning centre/Word list A big list will constantly show you what words you don't know and what you need to work on and is useful for testing yourself. sickbed sicken sickened sickening sickeningly sickens sicker sickest sickle sickles sickliest sickly sickness sicknesses sickroom side sideband sidebands Drawing up a comprehensive list of words in English is important as a reference when learning a language as it will show the equivalent words you need to learn in the other language to achieve fluency. Eventually these words will all be translated into big lists in many different languages and using the words in phrase contexts as a resource. You can use the list to generate your own lists in whatever language you're learning and to test yourself 538c184102

There are many known environmental, genetic, and biological causes of autism. Research indicates that genetic factors predominantly contribute to its appearance. The heritability... 538c184102 For a listing of ongoing discussions, see ... 538c184102 Future of Wikinews (potential merger with Wikipedia) 538c184102

Causes of autism Attempts have been made to incorporate the known genetic and environmental causes into a comprehensive causative framework. A 2011 study proposed the "Solitary Forager Hypothesis" Many causes of autism, including environmental and genetic factors, have been recognized or proposed, but understanding of the etiology of autism is incomplete. ASD (autism spectrum disorder) is a neurodevelopmental disorder marked by impairments in communicative ability and social interaction, as well as restricted and repetitive behaviors, interests, or activities not suitable for the individual's developmental stage. autism may prove similar to diseases such as sickle cell anemia, that demonstrate balanced polymorphism. The severity of symptoms and functional impairment vary between individuals 538c184102
