Dashboard (computing) In other usage, "dashboard" is another name for "progress report" or "report" and is considered a form of data visualization. computer information systems, a dashboard is a type of graphical user interface which often provides at-a-glance views of data relevant to a particular In computer information systems, a dashboard is a type of graphical user interface which often provides at-a-glance views of data relevant to a particular objective or process through a combination of visualizations and summary information 001726d528

The idea of digital dashboards followed the study of decision support systems in the 1970s. Early predecessors of the modern business dashboard were first developed in the 1980s in the form of Executive Information Systems (EISs). Due to problems primarily with data refreshing and handling, it was soon realized that the approach wasn't practical as information was often incomplete, unreliable, and spread across... 001726d528
