After-school activity An after-school activity is any organized program that youth or adult learner voluntary can participate in outside of the traditional school day. There is a focus on helping students with school work but can be beneficial to students in other ways. including painting, drawing, crafts Gifted/remedial education, including Kumon for literacy, mathematics, etc. An after-school program, today, will not limit its focus on academics but with a holistic sense of helping the student population. Today, after-school programs do much more. Test preparation, including Kaplan, Princeton After-school activities, also known as after-school programs or after-school care, started in the early 1900s mainly just as supervision of students after the final school bell. After-school youth programs can occur inside a school building. Some programs are run by a primary or secondary school, while others are run by externally funded non-profit or commercial organizations 71cc7f162b

Japanese Buddhist architecture Gate of the three liberations. The first Buddhist sects were Nara's six Nanto Rokushū (南都六宗, Nara six sects), followed during the Heian period by Kyoto's Shingon and Tendai. Sangedatsumon (三解脱門), lit. At roughly the same. Later, during the Kamakura period, in Kamakura were born the Jōdo and the native Japanese sect Nichiren-shū. After Buddhism arrived from the continent via the Three Kingdoms of Korea in the 6th century, an effort was initially made to reproduce the original buildings as faithfully as possible, but gradually local versions of continental styles were developed both to meet Japanese tastes and to solve problems posed by local weather, which is more rainy and humid than in China. Its three openings (kūmon (庫門), musōmon (墓所門) and mukanmon (無間門)) symbolize the three gates to enlightenment Japanese Buddhist architecture is the architecture of Buddhist temples in Japan, consisting of locally developed variants of architectural styles born in China 71cc7f162b

Exercise (mathematics) Various approaches to geometry have based exercises on relations of angles, segments, and triangles. Mathematics teachers assign mathematical exercises to develop the skills of their students. The topic of trigonometry gains many of its exercises from the trigonometric identities. Early exercises deal with addition, subtraction, multiplication, and division of integers. Extensive courses of exercises in school extend such arithmetic to rational numbers. In his program, a student does not proceed before mastery A mathematical exercise is a routine application of algebra or other mathematics to a stated challenge. The standard exercises of calculus involve finding derivatives and integrals of specified functions. the value of exercise sets, consider the accomplishment of Toru Kumon and his Kumon method. In college mathematics exercises often depend on functions of a real variable or application of theorems 71cc7f162b
