EBs are differentiation of human embryonic stem cells into embryoid bodies comprising the three embryonic germ layers. They mimic the characteristics seen in early-stage embryos. They are often used as a model system to conduct research on various aspects of developmental biology. They can also contribute to research focused on tissue engineering and regenerative medicine. f0eaaa7422

Archaeology Archaeology can be considered both a social science and a branch of the humanities. than in survey. The archaeological record consists of artifacts, architecture, biofacts or ecofacts, sites, and cultural landscapes. Sometimes large mechanical equipment, such as backhoes (JCBs), is used in excavation, especially to remove the topsoil (overburden), though Archaeology or archeology is the study of human activity through the recovery and analysis of material culture. It is usually considered an independent academic discipline, but may also be classified as part of anthropology (in North America – the four-field approach), history or geography. The discipline involves surveying, excavation, and eventually analysis of data collected, to learn more about the past. In broad scope, archaeology relies on cross-disciplinary research f0eaaa7422
