Project-based learning Students learn about a subject by working for an extended period of time to investigate and respond to a complex question, challenge, or problem. Project-based learning contrasts with paper-based, rote memorization, or teacher-led instruction that presents established facts or portrays a smooth path to knowledge by instead posing questions, problems, or scenarios. It is a style of active learning and inquiry-based learning. 30-hour (15-lesson) short film project in English with (pre-)intermediate students: planning, lessons, evaluation, deliverables, samples and experiences Project-based learning is a teaching method that involves a dynamic classroom approach in which it is believed that students acquire a deeper knowledge through active exploration of real-world challenges and problems 31b5cbe646
