

Martindale Complete Drug Reference 36th Edition

CTA was introduced for medical... c14045ba66 EV/NETE is approved for use in at least 36 countries, and is the most widely used combined injectable contraceptive. It is available widely throughout Latin America, in a few Asian and African countries, and in Turkey. c14045ba66

Estradiol hexahydrobenzoate London: Pharmaceutical Press.). 2100, 2124–2125 Estradiol hexahydrobenzoate (EHHB), sold under a number of brand names including Benzo-Ginoestril A. , BenzoGynoestryl Retard, Ginestryl-15-Depot, Menodin, and Tardoginestryl, is an estrogen medication which was previously used for indications such as menopausal hormone therapy and gynecological disorders. Martindale: The Complete Drug Reference (36th ed. P. "Sex hormones and their modulators". pp. (2009). SC, ed. EHHB is given by injection into muscle at regular intervals, for instance once every few weeks c14045ba66

Estradiol valerate/prasterone enanthate EV/DHEA-E reportedly has a duration of about 21 days. Martindale: The Complete Drug Reference (36th ed. pp.). London: Pharmaceutical Press. (2009). SC, ed. 2100, 2124–2125 Estradiol valerate/prasterone enanthate (EV/DHEA-E), sold under the brand name Gynodian Depot among others, is an injectable combination medication of estradiol valerate (EV), an estrogen, and prasterone enanthate (DHEA-E), an androgen, estrogen, and neurosteroid, which is used in menopausal hormone therapy for women. It is provided in the form of 1 mL ampoules containing 4 mg estradiol valerate and 200 mg prasterone enanthate in an oil solution and is administered by intramuscular injection once every 4 to 6 weeks. "Sex hormones and their modulators" c14045ba66

Esterified estrogens). p. 2097. ISBN 978-0-85369-840-1 Esterified estrogens (EEs), sold under the brand names Estratab and Menest among others, is an estrogen medication which is used hormone therapy for menopausal symptoms and low sex hormone levels in women, to treat breast cancer in both women and men, and to treat prostate cancer in men. It is taken by mouth. London: Pharmaceutical Press. (2009). "Sex hormones and their modulators". Martindale: The Complete Drug Reference (36th ed. SC, ed.

It is formulated alone or in combination with methyltestosterone c14045ba66

Side effects of EEs include nausea, breast tension, edema, and breakthrough bleeding among others. It is an estrogen, or an agonist of the estrogen receptors, the biological target of estrogens like estradiol. EEs are a prodrug mainly of estradiol and to a lesser extent of equilin. c14045ba66 Side effects of EHHB include breast tenderness, breast enlargement, nausea, headache, and fluid retention. EHHB is an estrogen and hence is an agonist of the estrogen receptor, the biological target of estrogens like estradiol. It is an estrogen ester and a prodrug of estradiol in the body. Because of this, it is considered to be a natural and bioidentical form of estrogen. c14045ba66 There are national, supranational, and international pharmacopoeias. c14045ba66

Legal status of methamphetamine p. Martindale: The Complete Drug Reference, 36th Edition. Pharmaceutical Press. of methamphetamine. 2158. ISBN 978-0-85369-840-1 The production, distribution, and sale of methamphetamine is restricted or illegal in many jurisdictions. Sweetman, Sean (2009-03-16) c14045ba66

Ditane was provided in the form of multi-use 10 mL vials containing 4 mg/mL EV and 90 mg/mL TE in an oil solution and was administered by intramuscular injection at regular intervals. Conversely, another preparation, Ditane-DS, was provided in the form of single-use 2 mL vials containing 8 mg/mL EV and 180 mg/mL TE in an oil solution, and was administered as a single intramuscular injection... c14045ba66 EHHB was first described... c14045ba66

Vitamin K antagonist London: Pharmaceutical Press. Sean C Sweetman, ed. The term "vitamin K antagonist" is technically a misnomer, as the drugs do not directly antagonize the action of vitamin K in the pharmacological sense, but rather the recycling of vitamin K. Martindale: The Complete Drug Reference (36th ed. "Phenindione";, p Vitamin K antagonists (VKA) are a group of substances that reduce blood clotting by reducing the action of vitamin K. Vitamin K antagonists (VKAs) have been the mainstay of anticoagulation therapy for more than 50 years.). Retrieved 21 June 2017. (2009) c14045ba66

The medication is available in Europe, Latin America, and Egypt. EV/DHEA-E was developed and marketed by Schering, was first described in the literature in 1972, and was introduced for medical use in April 1975. c14045ba66 CTA is an estrogen, or an agonist of the estrogen receptors, the biological target of

estrogens like estradiol. It is a high-efficacy partial estrogen and shows some properties of a selective estrogen receptor modulator, with predominantly estrogenic activity but also some antiestrogenic activity. CTA itself is inactive and is a prodrug in the body. c14045ba66 They are used as anticoagulant medications in the prevention of thrombosis, and in pest control, as rodenticides. c14045ba66

Etamsylate It also inhibits biosynthesis and action of those prostaglandins which cause platelet disaggregation, vasodilation and increased capillary permeability.). 1007/BF01989908. Martindale: The complete drug reference (36th ed. doi:10. London; Chicago: Pharmaceuticale Press, PhP. 2009 Etamsylate (sometimes spelled ethamsylate) is an antihemorrhagic agent which is believed to work by increasing resistance in the endothelium of capillaries and promoting platelet adhesion. PMID 7319004. S2CID 36393605 c14045ba66

Etamsylate is the salt of dobesilic acid and diethylamine. c14045ba66

Pharmacopoeia Squire's Companion to the Pharmacopoeia and Martindale: The complete drug reference (formerly Martindale's: the extra pharmacopoeia), in which all new A pharmacopoeia, pharmacopeia, or pharmacopoea (or the typographically obsolete rendering, pharmacopœia), meaning "drug-making", in its modern technical sense, is a reference work containing directions for the identification of compound medicines. Descriptions of the individual preparations are called monographs. These are published or sanctioned by a government or a medical or pharmaceutical society, giving the work legal authority within a specified jurisdiction. In a broader sense it is a collection of pharmaceutical drug specifications c14045ba66

Estradiol valerate/testosterone enanthate "Sex hormones and their modulators". London: Pharmaceutical Press. (2009). Martindale: The Complete Drug Reference (36th ed. 2100, 2124–2125 Estradiol valerate/testosterone enanthate (EV/TE), sold under the brand names Primodian Depot and Ditate among others, is an injectable combination medication of estradiol valerate (EV), an estrogen, and testosterone enanthate (TE), an androgen/anabolic steroid, which is used in menopausal hormone therapy for women. pp. SC, ed.). The medication is also used to suppress lactation in postpartum women (brand name Deladumone) c14045ba66

Estradiol valerate/norethisterone enantate "Sex hormones and their modulators".). , ed. p. The medication is given once a month by injection into muscle. 2082. Martindale: The Complete Drug Reference (36th ed. ISBN 978-0-85369-840-1 Estradiol valerate/norethisterone enantate (EV/NETE), sold under the brand name Mesigyna among others, is a form of combined injectable birth control which is used to prevent pregnancy in women. It contains estradiol valerate (EV), an estrogen, and norethisterone enantate (NETE), a progestin. (2009). London: Pharmaceutical Press c14045ba66

Chlorotrianisene It is taken by mouth. SC, ed. "Sex hormones and their modulators". 2085. p.). (2009). London: Pharmaceutical Press. Martindale: The Complete Drug Reference (36th ed. ISBN 978-0-85369-840-1 Chlorotrianisene (CTA), also known as tri-p-anisylchloroethylene (TACE) and sold under the brand name Tace among others, is a nonsteroidal estrogen related to diethylstilbestrol (DES) which was previously used in the treatment of menopausal symptoms and estrogen deficiency in women and prostate cancer in men, among other indications, but has since been discontinued and is now no longer available c14045ba66

EEs were introduced for medical use by 1970. They are available in only a few countries, such as Chile and the United States. They have also... c14045ba66
