Mobile Information Device Profile The first MIDP devices were launched in April 2001. The Record Management Mobile Information Device Profile (MIDP) is a specification published for the use of Java on embedded devices such as mobile phones and PDAs. also said that "LCD UI" stands for "lowest common denominator" due to the fact the specific UI has the simplest possible design. MIDP was developed under the Java Community Process. MIDP is part of the Java Platform, Micro Edition (Java ME) framework and sits on top of Connected Limited Device Configuration (CLDC), a set of lower level programming interfaces 87005c0e01
