

Seltzer And Bender S Dental Pulp

A good article (GA) is a Wikipedia article that meets a core set of editorial standards, the good article criteria, passing through the good article nomination process successfully. They are well-written, contain factually accurate and verifiable information, are broad in coverage, neutral in point of view, stable, and illustrated, where possible, by relevant images with suitable copyright licenses. Good articles do not have to be as comprehensive as featured articles (FA), but they should not omit any major facets: a comparison of the criteria for good and featured articles describes further differences. 685eae9104

infection, the pulp chamber is partially necrosed for a period of time and if left untreated, the area of cell death expands until
the entire pulp necroses. The most common clinical signs present in a tooth with a necrosed pulp would be a grey discoloration
of the crown and/or periapical radiolucency. This altered translucency in the tooth is due to disruption and cutting off of the
apical neurovascular blood supply. 685eae9104
