Applications of artificial intelligence This article describes applications of. "Scaffolding protein functional sites using deep learning". Artificial intelligence (AI) has been used in applications throughout industry and academia. In recent years, there have been massive advancements in the field of Generative Artificial Intelligence, which uses generative models to produce text, images, videos or other forms of data. 377 (6604): 387–394 Artificial intelligence is the capability of computational systems to perform tasks typically associated with human intelligence, such as learning, reasoning, problem-solving, perception, and decision-making. Frank; Correia, Bruno; Ovchinnikov, Sergey; Baker, David (22 July 2022). Within the field of Artificial Intelligence, there are multiple subfields. The subfield of Machine learning has been used for various scientific and commercial purposes including language translation, image recognition, decision-making, credit scoring, and e-commerce.
