RKM code The updated IEC 60062:2016, amended in 2019, comprises the most recent release of the standard. 2018 - The RKM code, also referred to as "letter

and numeral code for resistance and capacitance values and tolerances", "letter and digit code for resistance and capacitance values and tolerances", or informally as "R notation" is a notation to specify resistor and capacitor values defined in the international standard IEC 60062 (formerly IEC 62) since 1952. Battery nomenclature Technical standards for battery sizes and types are set by standards organizations such as International Electrotechnical Commission (IEC) and American National Standards Institute (ANSI). The long history of disposable

dry cells means that many manufacturer-specific and national standards were used to designate sizes, long before international standards were reached. They will be designated as: N1A1A2A3N2/N3/N4-N5 where N1 denotes number of series connected cells and N5 denotes number of parallel connected cells (only Standard battery nomenclature describes portable dry cell batteries that have physical dimensions and electrical characteristics interchangeable between manufacturers. Popular sizes are still referred to by old standard or manufacturer designations, and some non-systematic designations have been included in current international standards due to wide use 42f3c3338a

The complete nomenclature for the battery will fully specify the size...
