Man page Topics covered include programs, system libraries, system calls, and sometimes local system details. These manual pages are typically requested by end users, programmers and administrators doing real time work but can also be formatted for printing. A man page (short for manual page) is a form of software documentation found on Unix and Unix-like operating systems. Topics covered include programs, A man page (short for manual page) is a form of software documentation found on Unix and Unix-like operating systems. The local host administrators can create and install manual pages associated with the specific host. A manual end user may invoke a documentation page by issuing the man command followed by the name of the item for which they want the documentation 2691da37dc

Make (software) In software development, Make is a command-line interface software tool that performs actions ordered by

configured dependencies as defined in a configuration In software development, Make is a command-line interface software tool that performs actions ordered by configured dependencies as defined in a configuration file called a makefile. It is commonly used for build automation to build executable code (such as a program or library) from source code. But, not limited to building, Make can perform any operation available via the operating system shell 2691da37dc

Puppet uses an open-core model; its free-software version was released under version 2 of the GNU General Public License (GPL) until version 2.7.0, and later releases use the Apache License, while Puppet Enterprise uses a proprietary license. Puppet and Puppet Enterprise operate on multiple Unix-like systems (including Linux, Solaris, BSD, Mac OS X, AIX, HP-UX) and has Microsoft Windows support. Puppet itself is written in Ruby. Facter, Puppet's cross-platform system profiling library, is written in C++. Puppet Server and Puppet DB are written in Clojure. 2691da37dc
