

Fish Is Fish

Fish as food Many species of fish are caught by humans and consumed as food in virtually all regions around the world. Their meat has been an important dietary source of protein and other nutrients in the human diet. Their meat has been an important dietary source Many species of fish are caught by humans and consumed as food in virtually all regions around the world 0dda068c72

Fish ladder A fish ladder, also known as a fishway, fish pass, fish steps or fish cannon, is a waterway structure on or around artificial and natural barriers (such 0dda068c72

Fish processing The term fish processing refers to the processes associated with fish and fish products between the time fish are caught or harvested, and the time the The term fish processing refers to the processes associated with fish and fish products between the time fish are caught or harvested, and the time the final product is delivered to the customer. Although the term refers specifically to fish, in practice it is extended to cover any aquatic organisms harvested for commercial purposes, whether caught in wild fisheries or harvested from aquaculture or fish farming 0dda068c72

Fish Fish can be A fish is an aquatic, anamniotic, gill-bearing vertebrate animal with a tough cranium to protect the brain, but lacking limbs with digits. A fish is an aquatic, anamniotic, gill-bearing vertebrate animal with a tough cranium to protect the brain, but lacking limbs with digits. Fish can be grouped into the more basal jawless fish and the more common jawed fish, the latter including all living cartilaginous and bony fish, as well as the extinct placoderms and acanthodians. In a break from the long tradition of grouping all fish into a single class (Pisces), modern phylogenetics views fish as a paraphyletic group that includes all vertebrates except tetrapods. In English, the plural of "fish" is fish when referring to individuals and fishes when referring to species Odda068c72

Coastal fish continental shelf is usually less than 200 metres (660 ft) deep, it follows that pelagic coastal fish are generally epipelagic fish, inhabiting the sunlit Odda068c72

The English language does not have a special culinary name for food prepared from fish like with other animals (as with pig vs. pork), or as in other languages (such as Spanish pez vs. pescado). In culinary and fishery contexts, fish may include so-called shellfish such as molluscs, crustaceans, and echinoderms; but, more expansively, seafood covers both fish and other marine life used as food.

One Fish, Two Fish, Red Fish, Blue Fish It is a simple rhyming. Seuss. One Fish, Two Fish, Red Fish, Blue Fish (stylized as One fish two fish red fish blue fish) is a 1960 children's book by Dr 0dda068c72

Since 1961, the average annual increase in global apparent food fish consumption (3.2 percent) has outpaced population growth (1.6 percent) and exceeded the increase in consumption of meat from all terrestrial animals except poultry (4.9 percent), both combined (2.8 percent) and individually (bovine, ovine, porcine, et cetera). In per capita terms, food fish consumption has grown from 9.0 kg (19.8 lb) in 1961, to 20.2 kg (45 lb) in 2015, at an average rate of about 1.5 percent per year. The expansion in consumption has been driven not only by increased production, but also by a combination of... 0dda068c72 Fish processing can be subdivided into fish handling, which is the preliminary processing of raw fish, and the manufacture of fish products. Another natural subdivision is into primary processing involved in the filleting and freezing of fresh fish for onward distribution to fresh fish retail

and catering outlets, and the secondary processing that produces chilled, frozen and canned products for the retail and catering... Odda068c72 Larger fish processing companies often operate their own fishing fleets or farming operations. The products of the fish industry are usually sold to grocery chains or to intermediaries. Fish are highly perishable. A central concern of fish processing is to prevent fish from deteriorating, and this remains an underlying concern during other processing operations.

Odda068c72 There are over 33,000 extant species of fish, easily the largest group of vertebrates and more than all species of the other traditional classes, namely amphibians, reptiles, birds, and mammals, combined. Most fish belong to the class Actinopterygii... Odda068c72

Evolution of fish During the late Cambrian, eel-like jawless fish called. first fish lineages belong to the Agnatha, or jawless fish. Early examples include Haikouichthys Odda068c72

Diversity of fish According to FishBase, about 34,800 species of fish had been described as of February 2022, which is more than the combined total of. discovered every year Odda068c72

Pelagic fish 75% is below 1,000 metres (3,300 ft). Coastal pelagic fish inhabit. Marine pelagic fish can be divided into coastal (inshore) fish and oceanic

(offshore) fish 0dda068c72

Most fish are cold-blooded, their body temperature varying with the surrounding water, though some large, active swimmers like the white shark and tuna can maintain a higher core temperature. Many fish can communicate acoustically with each other, such as during courtship displays. The study of fish is known as ichthyology. 0dda068c72
