Causes of mental disorders posit that mental disorders involve the dysfunctional operation of mental modules adapted to ancestral physical or social environments but not necessarily A mental disorder is an impairment of the mind disrupting normal thinking, feeling, mood, behavior, or social interactions, and accompanied by significant distress or dysfunction. Most mental disorders result in a combination of several different factors rather than just a single factor. Although the causes of most mental disorders are not fully understood, researchers have identified a variety of biological, psychological, and environmental factors that can contribute to the development or progression of mental disorders. The causes of mental disorders are very complex and vary depending on the particular disorder and the individual 6363d7b834
