The causes of Alzheimer's disease remain poorly understood. There are many environmental and genetic risk factors associated with its development... efc883581e Dzogchen emerged during the first dissemination of Buddhism in Tibet, around the 7th to 9th centuries CE. While it is considered a Tibetan development by some scholars, it draws upon key ideas from Indian sources. The earliest Dzogchen texts appeared in the 9th century, attributed to Indian masters. These texts, known as the Eighteen Great Scriptures, form... efc883581e

Ahimsa 1111/j. 'nonviolence') is the ancient Indian principle of nonviolence which applies to actions towards all living beings. tb03567. x. 103-108. From such evidence, a 2018 systematic review proposed a conceptual model that delirium results when insults/stressors trigger a breakdown of brain network Delirium (formerly acute confusional state, an ambiguous term that is now discouraged) is a specific state of acute confusion attributable to the direct physiological consequence of a medical condition, effects of a psychoactive substance, or multiple causes, which usually develops over the course of hours to days. People with delirium may experience other neuropsychiatric disturbances including changes in psychomotor activity (e. g. g. , hallucinations and delusions), although these efc883581e

Ahimsa is also related to the notion that all acts of violence have karmic consequences. While ancient scholars of Brahmanism had already investigated and refined the principles of efc883581e Ahimsa (also spelled Ahinsa) is one of the cardinal virtues of Jainism, where it is the first of the Pancha Mahavrata. It is also one of the central precepts of Hinduism and is the first

of the five precepts of Buddhism. Ahimsa is inspired by the premise that all living beings have the spark of the divine spiritual energy; therefore, to hurt another being is to hurt oneself.

Alzheimer's disease As the disease advances, symptoms can include problems with language, disorientation (including easily getting lost), mood swings, loss of motivation, self-neglect, and behavioral issues. Gradually, bodily functions are lost, ultimately leading to death. The most common early symptom is difficulty in remembering recent events. As a person's condition declines, they often withdraw from family and society. Alzheimer's disease (AD) is a neurodegenerative disease and is the most common form of dementia accounting for around 60-70% of cases. getting lost), mood swings, loss of motivation, self-neglect, and behavioral issues. Although the speed of progression can vary, the average life expectancy following diagnosis is three to twelve years. As a person's condition declines, they often withdraw from family and society

Co-creation Less Co-creation, in the context of a business, refers to a product or service design process in which input from consumers plays a central role from beginning to end. Another

meaning is the creation of value by ordinary people, whether for a company or not. Less specifically, the term is also used for any way in which a business allows consumers to submit ideas, designs or content. This way, the firm will not run out of ideas regarding the design to be created and at the same time, it will further strengthen the business relationship between the firm and its customers. the context of a business, refers to a product or service design process in which input from consumers plays a central role from beginning to end efc883581e

The architecture of a software system is a metaphor, analogous to the architecture of a building.

It functions as the blueprints for the system and the development project, which project management can later use to extrapolate the tasks necessary to be executed by the teams and people involved. efc883581e The earliest maps ignored the curvature of Earth's surface, both because the shape of the Earth was unknown and because the curvature is not important across the small areas being mapped. However, since the age of Classical Greece, maps of large regions, and especially of the world, have used projection from a model globe to control how the inevitable distortion gets apportioned... efc883581e

History of cartography Maps were produced extensively by ancient Babylon, Greece, Rome, China, and India. The earliest putative maps include cave paintings and etchings on tusk and

Neuroscience neuroscientific findings and conceptual research, soliciting and integrating both perspectives. The understanding of the biological basis of learning, memory, behavior, perception, and consciousness has been described by Eric Kandel as the "epic challenge" of the biological sciences. It is a multidisciplinary science that combines physiology, anatomy, molecular biology, developmental biology, cytology, psychology, physics, computer science, chemistry, medicine, statistics, and mathematical modeling to understand the fundamental and emergent properties of neurons, glia and neural circuits. For example, neuroscience research on empathy solicited an Neuroscience is the scientific study of the nervous system (the brain, spinal cord, and peripheral nervous system), its functions, and its disorders efc883581e
