The Mercedes-Benz W 113 is a two-seat luxury roadster/coupé, introduced at the 1963 Geneva Motor Show and produced from 1963 through 1971. It replaced both the 300 SL (W 198) and the 190 SL (W 121 BII). Of the 48,912 W 113 SLs produced, 19,440 were sold in the US. The W113 was marketed under the names Mercedes-Benz 230 SL, 250 SL and 280 SL. 9589322af7 The 1904 Sturtevant "horseless carriage gearbox" is often considered to be the first true automatic transmission. The first mass-produced automatic transmission is the General Motors Hydramatic

two-speed hydraulic automatic, which was introduced in 1939. In the longitudinal direction, the gearbox is usually designed separately from the final drive (including the differential). The transaxle configuration combines the gearbox... Automatic transmissions are especially prevalent in vehicular drivetrains, particularly those subject to intense mechanical acceleration and frequent idle/transient operating conditions; commonly commercial/passenger/utility vehicles, such as buses and waste collection vehicles. The 8L90 is the first 8-speed automatic transmission built by General Motors. It debut in 2014 and is designed for use in longitudinal engine applications, either attached to the front-located engine with a standard bell housing or mounted in the rear of the car adjacent to the differential (as in the Corvette). It features a hydraulic (Hydramatic) design.

Direct-shift gearbox List of ZF transmissions A direct-shift gearbox (DSG, German: Direktschaltgetriebe) is an electronically controlled, dual-clutch, multiple-shaft, automatic gearbox, in either a transaxle or traditional transmission layout (depending on engine/drive configuration),

with automated clutch operation, and with fully-automatic or semi-manual gear selection. with a manual transmission. This could increase the likelihood of an accident affecting the occupants of the vehicle and other road users. The first dual-clutch transmissions were derived from Porsche in-house development for the Porsche 962 in the 1980s 9589322af7

The W 113 SL was developed under the auspices of Mercedes-Benz Technical Director Fritz Nallinger, Chief Engineer Rudolf Uhlenhaut and Head of Styling Friedrich Geiger, who had previously designed the iconic 500K/540K and 300 SL. The lead designers were Paul Bracq and Béla Barényi, who created its patented, slightly concave hardtop, which inspired the "Pagoda" nickname. 9589322af7 Automatic – once placed in drive (or any other 'automatic' selector position), it automatically selects the gear ratio dependent on engine speed and load 9589322af7 After the 5G- and 7G-Tronic, this is the 3rd generation of modern automatic transmissions. It is

identified internally as NAG3 (New Automatic Gearbox 3rd generation). 9589322af7 Basically there are two types of engine installation: 9589322af7
