A domain controller is a server running the Active Directory Domain Services (AD DS) role. It authenticates and authorizes all users and computers in a Windows domain-type network, assigning and enforcing security policies for all computers and installing or updating software. For example, when a user logs into a computer which is part of a Windows domain, Active Directory checks the submitted username and password and determines whether the user... 84a3df03c0

System administrator The system administrator seeks to ensure that the uptime, performance, resources, and An IT administrator, system administrator, sysadmin, or admin is a person who is responsible for the upkeep, configuration, and reliable operation of computer systems, especially multi-user computers, such as servers. The system administrator seeks to ensure that the uptime, performance, resources, and security of the computers they manage meet the needs of the users, without exceeding a set budget when doing so. computer systems, especially multi-user computers, such as servers 84a3df03c0

Microsoft Windows [citation needed] Microsoft had begun to integrate Git into Team Foundation Server in 2013, but Windows (and Office) continued to Windows is a product line of proprietary graphical operating systems developed and marketed by Microsoft. the size of Windows. It is grouped into families and subfamilies that cater to particular sectors of the computing industry - Windows (unqualified) for a consumer or corporate workstation, Windows Server for a server and Windows IoT for an embedded system. Windows is sold as either a consumer retail product or licensed to third-party hardware manufacturers who sell products bundled with Windows 84a3df03c0

Outlook... 84a3df03c0 The first version of Windows, Windows 1.0, was released on November 20, 1985, as a graphical operating system shell for MS-DOS in response to the growing interest in graphical user interfaces (GUIs). The name "Windows" is a reference to the windowing system in GUIs. The 1990 release of Windows 3.0 catapulted its market... 84a3df03c0

Active Directory Directory (AD) is a directory service developed by Microsoft for Windows domain networks. However, it ultimately became an umbrella title for various directory-based identity-related services. Windows Server operating systems include it as a set of processes and services. Originally, only centralized domain management used Active Directory. Windows Server operating systems include it as a set of processes Active Directory (AD) is a directory service developed by Microsoft for Windows domain networks 84a3df03c0

Microsoft SQL Server Microsoft markets at least a dozen different editions of Microsoft SQL Server, aimed at different audiences and for workloads ranging from small single-machine applications to large Internet-facing applications with many concurrent users. As a database server, it is a software product with the primary function of storing and retrieving data as requested by other software applications—which may run either on the same computer or on another computer across a network (including the Internet). Microsoft SQL Server is a proprietary relational database management system developed by Microsoft using Structured Query
