The ATM was manually operated by the astronauts aboard Skylab from 1973-74, yielding data principally as exposed photographic film that was returned to Earth with the crew. The film magazines had to be changed out by the crew during spacewalks, although some instruments had a live video feed that could be observed from inside the space station. Some of the first Polaroid photos (an instant film-to-hard copy camera) in space were taken of a Skylab CRT video screen displaying the Sun as recorded by an ATM instrument. Although the ATM was integrated with the Skylab station... 83d48d16cc The S-Series was marketed in three generations from the fall of

Its automobile platform, the Z-body, developed in-house at Saturn and sharing little with other General Motors platforms, used a spaceframe design.

Pioneered on the Pontiac Fiero during the 1980s, the spaceframe used non-load-carrying plastic side panels. These polymer panels were dent-resistant, something that remained Saturn's unique selling proposition until a few years before the brand was discontinued. 83d48d16cc

Official naming citations of newly named small Solar System bodies are approved and published in a bulletin by IAU's Working Group for Small Bodies Nomenclature (WGSBN). Before May 2021, citations were published in MPC's Minor Planet Circulars for many decades. Recent citations can also be found on the JPL Small-Body Database (SBDB). Until his death in 2016, German astronomer Lutz D. Schmadel compiled these citations into the Dictionary of Minor... 83d48d16cc
