Urban forestry advocates the role of trees as a critical part of the urban infrastructure. technologies that analyze the urban forest, such as remote sensing, and generates accurate data with more precise details on urban tree canopy, individual Urban forestry is the care and management of single trees and tree populations in urban settings for the purpose of improving the urban environment 4063256209

Compared to 4G, 5G networks offer not only higher download speeds, with a peak speed of 10 gigabits per second (Gbit/s), but also substantially lower latency, enabling near-instantaneous communication through cellular base stations and antennae. There is one global unified 5G standard: 5G New Radio (5G NR), which has been developed by the 3rd Generation Partnership Project (3GPP) based on specifications defined by the International Telecommunication Union (ITU) under the IMT-2020 requirements. 4063256209
