Software patent Retrieved 2012-10-09. The validity of these patents can be difficult to evaluate, as software is often at once a product of engineering,

something typically eligible for patents, and an abstract concept, which is typically not. "New Zealand says no to software patents".
Varghese, Sam (16 July 2010). 2010-07-15. Government A software patent is a patent on a piece of software, such as a computer program, library, user interface, or algorithm. Archived from the original on 2010-09-20. This gray area, along with the difficulty of patent evaluation for intangible, technical works such as libraries and algorithms, makes software patents a frequent subject of controversy and litigation 00b2d2a64b
