In general, a good thing to remember about the different types of medications is this... Search filters
Plain and simple, you MUST know your medications!
There will be very many questions involving them in some way, shape, or form on the exam.
Remember this: If the patient's bedside peak flow improves 15% after a bronchodilator treatment is given, then you know that the medication was effective and it can be considered a reversible obstructive airway disease. Lab
Definitely remember and think Theophylline if you happen to see a question about methylxanthines on the exam.
