The MU-series product line superseded the company's previous TG-series modules, the TG100 and TG300. Although the majority of Yamaha's MU-series modules were meant for the home user, the company also made rack-mount versions of the MU90 and MU100 called the MU90R and MU100R, respectively, for professional use. b8e1bc4903 When it was introduced, the 500cc TMAX engine was the largest (and most powerful) ever used in a production scooter. Yamaha enlarged the engine to 530cc for 2012 and subsequent models. The most recent TMAX redesign, with the model designation XP530, is for the 2017 model year. This model includes D-Mode which lets the rider select a sportier engine running mode for more thrilling performance. Yamaha used the designation XP500 for all previous model years; more than 233,000 TMAX scooters have been sold... b8e1bc4903

Yamaha TX81Z The Yamaha DX11 keyboard synth was released the following year, offering improved editing abilities. The TX81Z has developed a famous reputation, largely based on some of its preset bass sounds. Unlike previous FM synthesizers of the era, the TX81Z was the first to offer a range of oscillator waveforms other than just sine waves, conferring the new timbres of some of its patches when compared to older, sine-only FM synths. The Yamaha TX81Z is a rack-mounted (keyboard-less) frequency modulation (FM) music synthesizer, released in 1987. It is also known as a keyboard-less Yamaha

The Thunderace five-valve four-cylinder engine was derived from the FZR1000R EXUP, and the frame was adapted from the YZF750R. The 5-speed gearbox from the FZR1000R EXUP was also reused. The Genesis engine has undergone some changes aimed at improving mid-range power rather than the maximum output, which remains 145 bhp (108 kW). The rotating mass of crankshaft and pistons have been lightened to improve throttle response, and new carburetors equipped with "Throttle Position Sensors" give the ignition some more data to help control the EXUP valve in the exhaust pipe. b8e1bc4903

This motorcycle is widely considered to be the R6's successor but this has never been officially stated by Yamaha. From 2021, production availability is limited to a non-homologated race-only specification in most global markets, causing race organizers to realign their engine eligibility criteria to encourage other manufacturers having larger than 600 cc displacements to enter road-race competition from 2022. The DT series was created by Yamaha in the late 1960s when the United States motorcycle market was down. Market research by Yamaha indicated that, despite slow motorcycle sales, there was a largely untapped market for off-road motorcycles. At the time, only a few specialty European manufacturers such as Bultaco and Husqvarna made motorcycles specifically for off-road use. Instead, many owners purchased road motorcycles and modified them for off-road use, typically by raising the muffler, adding braced... b8e1bc4903
