Diamond Diamond has the highest hardness and thermal conductivity of any natural material, properties that are used in major industrial applications such as cutting and polishing tools. timescale of millions to billions of years. Experiments have found that diamond Diamond is a solid form of the element carbon with its atoms arranged in a crystal structure called diamond cubic. Another solid form of carbon known as graphite is the chemically stable form of carbon at room temperature and pressure, but diamond is metastable and converts to it at a negligible rate under those conditions. However, at temperatures above about 4500 K, diamond rapidly converts to graphite. Diamond is tasteless, odourless, strong, brittle solid, colourless in pure form, a poor conductor of electricity, and insoluble in water bcb8ea8039

Reorganization plan of United States Army See also ADP 3-0; ADP 6-22; FM 6-22; ADP 1-1; and ADP 5-0 David B The reorganization plan of the United States Army was implemented from 2006 to 2016 under the direction of the Brigade Modernization Command. (July 2019) ADP 6-0 Mission Command: Command and Control of Army Forces 4 chapters bcb8ea8039

This effort formally began in 2006 when General Peter Schoomaker (the 35th Army Chief of Staff) was given the support to move the Army from its Cold War divisional orientation to a full-spectrum capability with fully manned, equipped and trained brigades; this effort was completed by the end of 2016. It has been the most comprehensive reorganization since World War II and included modular combat brigades, support brigades, and command headquarters, as well as rebalancing the active and reserve components. bcb8ea8039 15:50, May 17, 2004 Dori deleted "Geoff Ball" (content was: ':"This page has been listed on [[Wikipedia:Votes for deletion]]. Clostridioides difficile infection Another Clostridioides difficile infection (CDI or C-diff), also known as Clostridium difficile infection, is a symptomatic infection due to the spore-forming bacterium Clostridioides difficile. It makes up about 20% of cases of antibiotic-associated diarrhea. actin depolymerization by a mechanism correlated with a decrease in the ADP-ribosylation of the low molecular mass GTP-binding Rho proteins. Complications may include pseudomembranous colitis, toxic megacolon, perforation of the colon, and sepsis. Antibiotics can contribute to detrimental changes in gut microbiota; specifically, they decrease short-chain fatty acid absorption, which results in osmotic, or watery, diarrhea. Symptoms include watery diarrhea, fever, nausea, and abdominal pain bcb8ea8039

The plan was first proposed in 1999 by Army Chief of Staff General Eric Shinseki but was bitterly opposed internally by the Army. bcb8ea8039 Clostridioides difficile infection is spread by bacterial spores found within feces. Surfaces may become contaminated with the spores, with further spread occurring via the hands of healthcare... bcb8ea8039 15:52, May 17, 2004 Dori deleted "Speaking with the Angel" (content was: '""Speaking whit an angel"" is a book whit storys from many good writers. The money that the book brought in was given to a school for authentic ...') bcb8ea8039
