The early part of the decade saw the long-predicted breakthrough of economic giants in Asia, like India and China, which had double-digit growth during nearly the whole decade. It is also benefited from an economic boom, which saw the two most populous countries becoming an increasingly dominant economic force. The rapid catching-up of emerging economies with developed countries sparked some protectionist tensions during the period and was partly responsible for an increase in energy and food prices at the end of the decade. The economic developments in the latter third of the decade were dominated by a worldwide...

Following Sun's acquisition by Oracle Corporation, development of OpenOffice.org slowed and eventually ended. In 2011, Oracle donated the project to the Apache

Software Foundation, which continues it as Apache OpenOffice, although that project has been largely dormant since 2015. A more actively developed fork, LibreOffice, was created in 2010 by members of the OpenOffice.org community. There is no official data on how many servers are in Google data centers, but Gartner estimated in a July 2016 report that Google at the time had 2.5 million servers. This number is changing as the company expands capacity and refreshes its hardware.

Geographic information system In a broader sense, one may consider such a system also to include human users and support staff, procedures and workflows, the body of knowledge of relevant concepts and methods, and institutional organizations. so that spatial data can be stored in relational tables, and extensions to SQL for spatial analysis operations such as overlay. Much of this often

happens within a spatial database; however, this is not essential to meet the definition of a GIS. Another example is the A geographic information system (GIS) consists of integrated computer hardware and software that store, manage, analyze, edit, output, and visualize geographic data b9dd18da5d

Applications of artificial intelligence
In recent years, there have been massive advancements in the field of Generative Artificial Intelligence, which uses generative models to produce text, images, videos or other forms of data. AI technology can also be utilized to improve system security Artificial intelligence is the capability of computational systems to perform tasks typically associated with human intelligence, such as learning, reasoning, problem-solving, perception, and decision-making. Within the field of Artificial Intelligence, there are multiple subfields. server-side request forgery, SQL injection, cross-site

scripting, and distributed denial-of-service. Artificial intelligence (AI) has been used in applications throughout industry and academia. The subfield of Machine learning has been used for various scientific and commercial purposes including language translation, image recognition, decision-making, credit scoring, and e-commerce.
