Wolf Mech & Boitani 2003, p. 38 (3): 115–116 The wolf (*Canis lupus*; pl. : wolves), also known as the grey wolf or gray wolf, is a canine native to Eurasia and North America. "Reconsidering the distribution of gray wolves". The wolf is the largest wild extant member of the family Canidae, and is further distinguished from other *Canis* species by its less pointed ears and muzzle, as well as a shorter torso and a longer tail. PMID 30969994. 328. The wolf is nonetheless related closely enough to smaller *Canis* species, such as the coyote and the golden jackal, to produce fertile hybrids with them. The wolf's fur is usually mottled white, brown, grey, and black, although subspecies in the arctic region may be nearly all white. More than thirty subspecies of *Canis lupus* have been recognized, including the dog and dingo, though grey wolves, as popularly understood, include only naturally-occurring wild subspecies.
