Mechanical engineering It is one of the oldest and broadest of the engineering branches. Mechanical engineers use thermo-science Mechanical engineering is the study of physical machines and mechanisms that may involve force and movement. Thermodynamics principles are used by mechanical engineers in the fields of heat transfer, thermofluids, and energy conversion. It is an engineering branch that combines engineering physics and mathematics principles with materials science, to design, analyze, manufacture, and maintain mechanical systems

Black body 568. The emissivity of a surface in A black body or blackbody is an idealized physical body that absorbs all incident electromagnetic radiation, regardless of frequency or angle of incidence. The radiation emitted by a black body in thermal equilibrium with its environment is called black-body radiation. In contrast, a white body is one with a "rough surface that reflects all incident rays completely and uniformly in all directions. Springer. Engineering thermofluids: thermodynamics, fluid mechanics, and heat transfer. ". The name "black body" is given because it absorbs all colors of light. p. ISBN 978-3-540-22292-7

Astronomical spectroscopy (link) Mahmoud Massoud (2005). "§ 2. Springer. 568 Astronomical spectroscopy is the study of astronomy using the techniques of spectroscopy to measure the spectrum

of electromagnetic radiation, including visible light, ultraviolet, X-ray, infrared and radio waves that radiate from stars and other celestial objects. 1 Blackbody radiation". Spectroscopy is also used to study the physical properties of many other types of celestial objects such as planets, nebulae, galaxies, and active galactic nuclei. Engineering thermofluids: thermodynamics, fluid mechanics, and heat transfer. Spectroscopy can show the velocity of motion towards or away from the observer by measuring the Doppler shift. p. A stellar spectrum can reveal many properties of stars, such as their chemical composition, temperature, density, mass, distance and luminosity 8433c820e5
