COBOL concerned about the rising cost of programming. A 1959 survey had found that in any data processing installation, the programming cost US\$800,000 on average and COBOL (; an acronym for "common business-oriented language") is a compiled English-like computer programming language designed for business use. COBOL is still widely used in applications deployed on mainframe computers, such as large-scale batch and transaction processing jobs. COBOL is primarily used in business, finance, and administrative systems for companies and governments. It is an imperative, procedural, and, since 2002, object-oriented language. Many large financial institutions were developing new systems in the language as late as 2006, but most programming in COBOL today is purely to maintain existing applications. Programs are being moved to new platforms, rewritten in modern languages, or replaced with other software 66e34cce94
