Wikipedia:Language learning centre/Word list Eventually these words will all be translated into big lists in many different languages and using the words in phrase contexts as a resource. A big list will constantly show you what words you don't know and what you need to work on and is useful for testing yourself. demounting demur demure demurely demurred demurring demurs demystification demystified demystify demystifying den denationalisation denationalization denationalized Drawing up a comprehensive list of words in English is important as a reference when learning a language as it will show the equivalent words you need to learn in the other language to achieve fluency. You can use the list to generate your own lists in whatever language you're learning and to test yourself c7774cadef

In vitro fertilisation After a fertilised egg (zygote) undergoes embryo culture for 2–6 days, it is transferred by catheter into the uterus, with the intention of establishing a successful pregnancy. medications, ultrasound scanning, laboratory tests, the actual IVF procedure, and any associated hospital charges and administrative costs. The process involves monitoring and stimulating the ovulatory process, then removing an ovum or ova (egg or eggs) from the ovaries and enabling sperm to fertilise them in a culture medium in a laboratory. Indirect costs In vitro fertilisation (IVF) is a process of fertilisation in which an egg is combined with sperm in vitro ("in glass") c7774cadef

The EBM Pyramid is a tool that helps in visualizing the hierarchy of evidence in medicine... c7774cadef IVF is a type of assisted reproductive technology used to treat infertility, enable gestational surrogacy, and, in combination with pre-implantation genetic testing, avoid the transmission of abnormal genetic conditions. When a fertilised egg from egg and sperm donors implants in the uterus of a genetically... c7774cadef

Factitious disorder imposed on self These actions are performed consciously, though the patient may be unaware of the motivations driving their behaviors. There are several risk factors and signs associated with this illness and treatment is usually in the form of psychotherapy but may depend on the specific situation, which is further discussed in the sections below. Psychiatrists and psychologists use thorough history, physical examinations, laboratory tests, imagery, and psychological Factitious disorder imposed on self (FDIS), sometimes referred to as Munchausen syndrome, is a complex mental disorder where individuals play the role of a sick patient to receive some form of psychological validation, such as attention, sympathy, or physical care. Diagnosis is usually determined by meeting specific DSM-5 criteria after ruling. Patients with FDIS intentionally falsify or induce signs and symptoms of illness, trauma, or abuse to assume this role. diagnose and treat mental illnesses) c7774cadef

Evidence-based medicine High-quality tests will have an AUC-ROC approaching 1, and high-quality publications about clinical tests will Evidence-based medicine (EBM), sometimes known within healthcare as evidence-based practice (EBP), is "the conscientious, explicit and judicious use of current best evidence in making decisions about the care of individual patients. It means integrating individual clinical expertise with the best available external clinical evidence from systematic research. sensitivity and specificity for a given test. " The aim of EBM is to integrate the experience of the clinician, the values of the patient, and the best available scientific information to guide decision-making about clinical management. The term was originally used to describe an approach to teaching the practice of medicine and improving decisions by individual physicians about individual patients c7774cadef

International Classification of Diseases This system is designed to map health conditions to corresponding generic categories together with specific variations; for these designated codes are assigned, each up to six. The ICD is maintained by the World Health Organization (WHO), which is the directing and coordinating authority for health within the United Nations System. Many countries have adapted and translated the ICPM in The International Classification of Diseases (ICD) is a globally used medical classification that is used in epidemiology, health management and clinical diagnosis. classification of modes of laboratory, radiology, surgery, therapy, and other diagnostic procedures. The ICD was originally designed as a health care classification system, providing a system of diagnostic codes for classifying diseases, including nuanced

classifications of a wide variety of signs, symptoms, abnormal findings, complaints, social circumstances, and external causes of injury or disease c7774cadef

Jim Keogh (technology writer) He is the author of more than 84 books including five. Keogh is. Keogh wrote one of the first books that showed how to solve the Year 2000 problem. He has appeared on CNN, FOX, GoodDay New York, NBC Weekend Today in New York, and ABC World Wide Business Report. He is the former educational columnist for The Record, New Jersey's second-largest daily newspaper. Keogh introduced PC programming across the US in his Popular Electronics magazine column in 1982, four years after Apple Computer started in a garage. Of Nursing Laboratory and Diagnostic Tests, Schaum's Outlines Pharmacology, Pediatric Nursing Demystified, Nursing Laboratory And Diagnostic Tests Demystified Jim Keogh is an American technology writer. For Dummies books. He developed the Electronic Commerce Track at Columbia University and was a team member who built one of the first Windows applications by a Wall Street firm that was featured by Bill Gates in 1986 on Windows on Wall Street c7774cadef

Alternative medicine Such practices are generally not part of evidence-based medicine. ISBN 978-0-470-43350-8 Alternative medicine refers to practices that aim to achieve the healing effects of conventional medicine, but that typically lack biological plausibility, testability, repeatability, or supporting evidence of effectiveness. 202–205. Unlike modern medicine, which employs the scientific method to test plausible therapies by way of responsible and ethical clinical trials, producing repeatable evidence of either effect or of no effect, alternative therapies reside outside of mainstream medicine and do not originate from using the scientific method, but instead rely on testimonials, anecdotes, religion, tradition, superstition, belief in supernatural "energies", pseudoscience, errors in reasoning, propaganda, fraud, or other unscientific. Hoboken NJ: John Wiley and Sons. pp. Toxicity, Interactions with Western Drugs, and Effects on Clinical Laboratory Tests c7774cadef

A diving rebreather is generally understood to be a portable unit carried by the user, and is therefore a type of self-contained underwater breathing apparatus... c7774cadef The disorder presents symptoms such as auditory and... c7774cadef

Childhood schizophrenia Schizophrenia is characterized by positive symptoms that can include hallucinations, delusions, and disorganized speech; negative symptoms, such as blunted affect and avolition and apathy, and a number of cognitive impairments. Laboratory tests include electroencephalogram EEG screening and brain imaging Childhood schizophrenia (also known as childhood-onset schizophrenia, and very early-onset schizophrenia) is similar in characteristics of schizophrenia that develops at a later age, but has an onset before the age of 13 years, and is more difficult to diagnose. Differential diagnosis is problematic since several other neurodevelopmental disorders, including autism spectrum disorder, language disorder, and attention deficit hyperactivity disorder, also have signs and symptoms similar to childhood-onset schizophrenia. pressure, and checking all vital signs to make sure the child is healthy c7774cadef

Diving rebreather This differs from open-circuit breathing apparatus, where the exhaled gas is discharged directly into the environment. Diagnostic reconstruction of dives with as many relevant A diving rebreather is an underwater breathing apparatus that absorbs the carbon dioxide of a diver's exhaled breath to permit the rebreathing (recycling) of the substantially unused oxygen content, and unused inert content when present, of each breath. The purpose is to extend the breathing endurance of a limited gas supply, and, for covert military use by frogmen or observation of underwater life, to eliminate the bubbles produced by an open circuit system. parameters relevant to the particular unit and dive data and that allow download of these data. Oxygen is added to replenish the amount metabolised by the diver c7774cadef
