

Basicsynth

Flanging Cockos - Flanging is an audio effect produced by mixing two identical signals together, one signal delayed by a small and (usually) gradually changing period, usually smaller than 20 milliseconds. Retrieved 17 April 2017. com. Retrieved 17 April 2017. com. A flanger is an effects unit that creates this effect. "Authentic Tape Flanging in REAPER. Plugin". "Software Synthesis". Varying the time delay causes these to sweep up and down the frequency spectrum. This produces a swept comb filter effect: peaks and notches are produced in the resulting frequency spectrum, related to each other in a linear harmonic series. kvradio. basicsynth b5148d7457

Part of the output signal is usually fed back to the input (a re-circulating delay line), producing a resonance effect that further enhances the intensity of the peaks and troughs. The phase of the fed-back signal is sometimes inverted, producing another variation on the flanger sound. b5148d7457
