Production of biomass (viable cellular material) 1586eabad0 In general, fermentations can be divided into four types: 1586eabad0

Industrial fermentation In addition to the mass production of fermented foods and drinks, industrial fermentation has widespread applications in chemical industry. Moreover, nearly all commercially produced industrial enzymes, such as lipase, invertase and rennet, are made by fermentation with genetically modified microbes. Bailey, J. Retrieved 12 December 2024. (2006). March 2024.). New York: McGraw Hill Publication Industrial fermentation is the intentional use of fermentation in manufacturing processes. F. In some cases, production of biomass itself is the objective, as is the case for single-cell proteins, baker's yeast, and starter cultures for lactic acid bacteria used in cheesemaking. ; Ollis, D. E. Commodity chemicals, such as acetic acid, citric acid, and ethanol are made by fermentation. Biochemical Engineering Fundamentals (2nd ed 1586eabad0

Jay Bailey Bailey & D. 484–489 "Jay Bailey as a Mentor The Students' Perspective" [2] J. , McGraw-Hill - James Edward Bailey (1944 – 9 May 2001), generally known as Jay Bailey, was an American pioneer of biochemical engineering, particularly metabolic engineering. E. In a special issue of a journal dedicated to his work, the editor said "Jay was one of biochemical engineering's most creative thinkers and spirited advocates, a true innovator who played an enormous role in establishing biochemical engineering as the dynamic discipline it is today". Ollis (1986) Biochemical Engineering Fundamentals 2nd ed. F. His numerous contributions in biotechnology and metabolic engineering have led to multiple awards including the First Merck Award in Metabolic Engineering 1586eabad0
