History of women in engineering the engineering profession include civil engineering, military engineering, mechanical engineering, chemical engineering, electrical engineering, aerospace The history of women in engineering predates the development of the profession of engineering. Before engineering was recognized as a formal profession, women with engineering skills often sought recognition as inventors. During the Islamic Golden Period from the 8th century until the 15th century there were many Muslim women who were inventors and engineers, such as the 10th-century astrolabe maker Al-'Ijliyyah f5245440ba

In engineering, a truss is a structure that "consists of two-force members only, where the members are organized so that the assemblage as a whole behaves as a single object". A two-force member is a structural component where force is applied to only two points. Although this rigorous definition allows the members to have any shape connected in any stable configuration, architectural trusses typically comprise five or more triangular units constructed with straight members whose ends are connected at joints referred to as nodes. f5245440ba

Bibliography of the American Civil War ". Bruce. Perhaps a hundred thousand books have been published about the Civil War. There are over 60,000 books on the war, with more appearing each month. The Centennial History of the Civil War. ISBN 0828103054. 3 The bibliography of the American Civil War comprises books that deal in large part with the American Civil War. New York: American Heritage, 1960. Authors James Lincoln Collier and Christopher Collier stated in 2012, "No event in American history has been so thoroughly studied, not merely by historians, but by tens of thousands of other Americans who have made the war their hobby. Catton, Bruce. The Picture History of the Civil War f5245440ba

In the 19th century, women who performed engineering work often had academic training in mathematics or science, although many of them were still not eligible to graduate with a degree in engineering, such as Ada Lovelace or Hertha Marks Ayrton. Rita de Moraes Sarmiento was one of the first women in Europe to be certified with an academic degree in engineering in 1896. In the United... f5245440ba

Truss In engineering, a truss is a structure that "consists of two-force members only, where A truss is an assembly of members such as beams, connected by nodes, that creates a rigid structure. such as beams, connected by nodes, that creates a rigid structure f5245440ba

Spanish Civil War The opposing Nationalists who established the Spanish State were an alliance of fascist Falangists, monarchists, conservatives, and traditionalists supported by Nazi Germany and Fascist Italy and led by a military junta among whom General Francisco Franco quickly achieved a preponderant role. entirely different picture emerges when inflation and exchange rates are taken into account, highest considered estimate; "la guerra civil fue una espantosa The Spanish Civil War (Spanish: guerra civil española) was fought from 1936 to 1939 between the Republicans and the Nationalists. Due to the international political climate at the time, the war was variously viewed as class struggle, a religious struggle, or a struggle between dictatorship and republican democracy, between revolution and counterrevolution. Republicans were loyal to the left-leaning Popular Front government of the Second Spanish Republic and included socialists, anarchists, communists and separatists f5245440ba

Sylvanus Thayer the institution to its current standards, and was an early advocate of engineering education in the United States. Sylvanus Thayer was born in Braintree Sylvanus Thayer (June 9, 1785 – September 7, 1872) was an American military officer, engineer and educator who served as the fifth superintendent of the United States Military Academy at West Point from 1817 to 1833. He is remembered as the "Father of the Military Academy" for reforming the institution to its current standards, and was an early advocate of engineering education in the United States f5245440ba

Ernest de Burgh /də'bz:r/ də-BUR; 18 January 1863 – 3 April 1929) was an Irish-born Australian civil engineer, chief-engineer for water supply and sewerage in New South Wales Ernest Macartney de Burgh (English: də-BUR; 18 January 1863 – 3 April 1929) was an Irish-born Australian civil engineer, chief-engineer for water supply and sewerage in New South Wales f5245440ba

There is no complete bibliography to the war; the largest guide to books is more than 50 years old and lists over 6,000 of the most valuable titles as evaluated by three leading scholars. Many specialized topics such as Abraham Lincoln, women, and medicine have their own lengthy bibliographies. The books... f5245440ba

Reconnaissance In military jargon, reconnaissance is abbreviated to recce (in British, Canadian, Australian English) and to recon (in American English), both derived from the root word reconnoitre / reconnoitering. In military jargon, reconnaissance In military operations, military reconnaissance () or scouting is the exploration of an area by military forces to obtain information about enemy forces, the terrain, and civil activities in the area of operations. military forces to obtain information about enemy forces, the terrain, and civil activities in the area of operations f5245440ba

History of women in engineering in the United Kingdom Some women did have more formal educations in the late 19th century and early 20th century, normally in mathematics or science subjects. There are several examples of women filing patents in the 19th century, including Sarah Guppy, Henrietta Vansittart and Hertha Ayrton. mathematics, and engineering subjects. Nina Cameron Graham graduated from University of Liverpool in 1912 with a degree in Civil Engineering, the first British Women have played a role in engineering in the United Kingdom for hundreds of years, despite the various societal barriers facing them. In the 18th and 19th century, there were few formal training opportunities for women to train as engineers and frequently women were introduced to engineering through family companies or their spouses f5245440ba

The types of reconnaissance include patrolling the local area of operations and long-range reconnaissance patrols, which are tasks usually realized in the United States of America by U.S. Army Rangers, cavalry scouts, and military intelligence specialists, using navy ships and submarines, reconnaissance aircraft, satellites to collect raw intelligence; and establishing observation posts... f5245440ba Collar and cuff insignia of a Confederate general. All generals wore the same insignia regardless of grade. f5245440ba
