Demining During the Angolan Civil War, elephants fled Demining or mine clearance is the process of removing land mines from an area. Moratuwa in Sri Lanka have been developing a method where a mongoose is guided by a remote-controlled robot. By contrast, the goal of humanitarian demining is to remove all of the landmines to a given depth and make the land safe for human use. Mechanical devices such as flails and excavators are sometimes used to clear mines. Specially trained dogs are also used to narrow down the search and verify that an area is cleared. In military operations, the object is to rapidly clear a path through a minefield, and this is often done with devices such as mine plows and blast waves 1e949991bd
