Yellow It is a primary color in subtractive color systems, used in painting or color printing. In the RGB color model, used to create colors on television and computer screens, yellow is a secondary color made by combining red and green at equal intensity. It is evoked by light with a dominant wavelength of roughly 575–585 nm. Carotenoids give the characteristic yellow color to autumn leaves, corn, canaries, daffodils, and lemons, as well as egg yolks, buttercups, and bananas. Project-based learning It is an Project-based learning is a teaching method that involves a dynamic classroom approach in which it is believed that students acquire a deeper knowledge through active exploration of real-world challenges and problems. It is a style of active learning and inquiry-based learning. Project-based learning contrasts with paper-based, rote memorization, or teacher-led instruction that presents established facts or portrays a smooth path to knowledge by instead posing questions, problems, or scenarios. Students learn about a subject by working for an extended period of time to investigate and respond to a complex question, challenge, or problem. instruction such as lectures, textbook-workbook-driven activities and inquiry as the preferred delivery method for key topics in the curriculum 34885a7a8d
