Sharaf al-Din al-Tusi (1135 Iran) known more often as Sharaf al-Dīn al-Ṭūsī or Sharaf ad-Dīn aṭ-Ṭūsī, was an Iranian mathematician and astronomer of the Islamic Golden Age (during the Middle Ages). 1135 Tus, Iran - c. the idea of a function, however his approach being not very explicit, algebra's decisive move to the dynamic function was made 5 centuries after him, Sharaf al-Dīn al-Muẓaffar ibn Muḥammad ibn al-Muẓaffar al-Ṭūsī (Persian: شرف الدین المظفر بن محمد بن المظفر التوسی; c

He received his B.A. in 1902 from the University of Michigan and then his M.A. in 1903 and Ph.D. in 1906, under the supervision of Virgil Snyder, from Cornell University. While working on his Ph.D., Sisam was a mathematics instructor at the United States Naval Academy from 1904 to 1906. He was an instructor in 1906-1907, a research associate in 1907-1909, and an assistant professor in 1909-1918 at the University of Illinois. From 1918 to 1948, he was a full-time professor at Colorado College. He did research on algebraic surfaces and was an invited speaker at the ICM in 1928 in Bologna. He was an editorial staff of the Transactions of the American Mathematical Society from 1930 to... 2 families of rosette groups - 2D point groups "The first.. [teaching machine] was developed by Sidney L. Pressey... While originally developed as a self-scoring machine... [it] demonstrated its ability to actually teach". Born and raised in Harlem, he was a graduate of Hamilton College and later earned a Master's degree in philosophy at Harvard University. He spent the 1960s working in the civil rights and anti-war movements, until he... There are three kinds of symmetry groups of the plane: 7 frieze groups - 2D line groups ('H' for Hamilton), or if blackboard bold is not available, by

Quaternion Porteous, Ian R. Cambridge Studies in Advanced Mathematics, the quaternion number system extends the complex numbers. OCLC 195566. The set of all quaternions is conventionally denoted by. "Chapter 8:

Quaternions". Clifford Algebras and the Classical Groups (PDF). (1995). Quaternions were first described by the Irish mathematician William Rowan Hamilton in 1843 and applied to mechanics in three-dimensional space. ISBN 9780873530583 577bfd1874

Bob Moses (activist) The New York Times described it: "If Chapter 1 of Mr. Mississippi to the Algebra Project, about Moses's life and work in civil rights and education. Moses's Robert Parris Moses (January 23, 1935 - July 25, 2021) was an American educator and civil rights activist known for his work as a leader of the Student Nonviolent Coordinating Committee (SNCC) on voter education and registration in Mississippi during the Civil Rights Movement, and his co-founding of the Mississippi Freedom Democratic Party. As part of his work with the Council of Federated Organizations (COFO), a coalition of the Mississippi branches of the four major civil rights organizations (SNCC, CORE, NAACP, SCLC), he was the main organizer for the Freedom Summer Project 577bfd1874

List of planar symmetry groups Space groups in Geometric algebra, D. 48, 023514 (2007) (22 pages) PDF [1] Coxeter, (1980), The 17 This article summarizes the classes of discrete symmetry groups of the Euclidean plane. Hestenes and J. The symmetry groups are named here by three naming schemes: International notation, orbifold notation, and Coxeter notation. Holt, Journal of Mathematical Physics 577bfd1874

Hilbert's thirteenth problem It entails proving whether a solution exists for all 7th-degree equations using algebraic (variant: continuous) functions of two arguments. "13-я Hilbert's thirteenth problem is one of the 23 Hilbert problems set out in a celebrated list compiled in 1900 by David Hilbert. It was first presented in the context of nomography, and in particular "nomographic construction" — a process whereby a function of several variables is constructed using functions of two variables. Approximation of Functions. Chapter 11. New York Chicago Toronto: Holt, Rinehart and Winston. The variant for continuous functions was resolved affirmatively in 1957 by Vladimir Arnold when

he proved the Kolmogorov–Arnold representation theorem, but the variant for algebraic functions remains unresolved. (1966). Vitushkin, Anatoli Georgievich (2004). MR 0213785 577bfd1874

H 577bfd1874 1. e4 577bfd1874 It is the most popular opening move in chess, followed by 1.d4, the Queen's Pawn Game. 577bfd1874

Conway polynomial (finite fields) Parker, who was the first to define them and compute examples. Conway polynomials satisfy a certain compatibility condition that had been proposed by Conway between the representation of a field and the representations of its subfields. Since Conway polynomials In mathematics, the Conway polynomial $C_{p,n}$ for the finite field F_{p^n} is a particular irreducible polynomial of degree n over F_p that can be used to define a standard representation of F_{p^n} as a splitting field of $C_{p,n}$. Conway polynomials were named after John H. Databases of Conway polynomials are available. are important in computer algebra where they provide portability among different mathematical databases and computer algebra systems. Since Conway polynomials are expensive to compute, they must be stored to be used in practice. They are important in computer algebra where they provide portability among different mathematical databases and computer algebra systems. Conway by Richard A 577bfd1874

Bettina Eick "GAP (smallgrp)-Contents". Retrieved 7 September 2022. She is Professor of Mathematics at the Technische Universität (TU) Braunschweig. Retrieved 7 September 2022. "Oscar: Computer algebra system" Bettina Eick is a German mathematician specializing in computational group theory. 7 September 2022. "Magma-Documentation" 577bfd1874

King's Pawn Game e4 It is the most popular opening move in chess, followed by 1. d4, the Queen's Pawn Game. with the move: 1. This article uses algebraic notation to describe The King's Pawn Game is any chess opening starting with the move: 577bfd1874

H. Quaternions are not quite a field, because in general, multiplication of quaternions is not commutative. Quaternions provide a definition of the quotient of two vectors in a three-dimensional space. Quaternions are generally represented in the form 577bfd1874 Pressey joined Ohio State in 1921, and stayed there until he retired in 1959. He continued publishing after retirement, with 18 papers between 1959 and 1967. He was a cognitive psychologist who "rejected a view of learning as an accumulation of responses governed by environmental stimuli in favor of one governed by

meaning, intention, and purpose". In fact, he had been a cognitive... 577bfd1874
