Charles Sanders Peirce insufficient, are the way of extension (a sign's objects, also called breadth, denotation, or application) and the way of intension (the objects' characteristics Charles Sanders Peirce (PURSS; September 10, 1839 – April 19, 1914) was an American scientist, mathematician, logician, and philosopher who is sometimes known as "the father of pragmatism". Bertrand Russell wrote "he was one of the most original minds of the later nineteenth century and certainly the greatest American thinker ever". According to philosopher Paul Weiss, Peirce was "the most original and versatile of America's philosophers and America's greatest logician" 476693715a

Comparison of American and British English common to both BrE and AmE but that show differences in frequency, connotation or denotation (for example, smart, clever, mad). Written forms of British and American English as found in newspapers and textbooks vary little in their essential features, with only occasional noticeable differences. Likewise, spoken American English varies widely across the country. In England, Wales, Ireland and especially parts of Scotland there are differing varieties of the English language, so the term 'British English' is an oversimplification. The language also spread to numerous other parts of the world as a result of British trade and settlement and the spread of the former British Empire, which, by 1921, included 470–570 million people, about a quarter of the world's population. Some differences in usage and The English language was introduced to the Americas by the arrival of the English, beginning in the late 16th century 476693715a

Animal testing Literally, "vivisection" means "live sectioning" of an Animal testing, also known as animal experimentation, animal research, and in vivo testing, is the use of animals, as model organisms, in experiments that seek answers to scientific and medical questions. research, in vivo testing, and vivisection have similar denotations but different connotations. This approach can be contrasted with field studies in which animals are observed in their natural environments or habitats. Experimental research with animals is usually conducted in universities, medical schools, pharmaceutical companies, defense establishments, and commercial facilities that provide animal-testing services to the industry. The focus of animal testing varies on a continuum from pure research, focusing on developing fundamental knowledge of an organism, to applied research, which may focus on answering some questions of great practical importance, such as finding a cure for 476693715a
