ISO/DIS 14644-1.2(2014): Classification of air cleanliness by particle concentration fb8a28cac0 The PIN is used to verify the identity of a customer (the user of a bank card) within an electronic funds transfer system, and (typically) to authorize the transfer or withdrawal of funds. Therefore, it is important to protect PINs against unauthorized disclosure or misuse. Modern banking systems require interoperability between a variety of PIN entry devices, smart cards, card readers, card issuers, acquiring banks and retailers – including transmission of PINs between those entities – so a common set of rules for handling and securing PINs is required, to ensure both technical compatibility and a mutually agreed level of security. ISO 9564 provides principles and techniques... fb8a28cac0
