Airbus A380 It is the world's largest passenger airliner and the only full-length double-deck jet airliner. It is the world's largest passenger airliner and the only The Airbus A380 is a very large wide-body airliner, developed and produced by Airbus until 2021. The Airbus A380 is a very large wide-body airliner, developed and produced by Airbus until 2021

Technical intelligence The related term, scientific and technical intelligence, addresses information collected or analyzed about the broad range of foreign science, technology, and weapon systems. During World War II the Army prepared technical manuals on certain items of enemy equipment; included information about enemy Technical intelligence (TECHINT) is intelligence about weapons and equipment used by the armed forces of foreign nations. prepared by teams of researchers

Due to difficulties with the electrical wiring,...

History of Airbus In 2006, EADS acquired the remaining 20% shares of Airbus Industrie GIE from BAE Systems. In 2000, the European Aeronautic Defence and Space Company (EADS) NV was established through the merger of Aerospatiale-Matra of France and DASA from Germany, and that subsequently bought Construcciones Aeronauticas from Spain. EADS NV was renamed. Today's Airbus is the product of international consolidation in the European aerospace industry tracing way before the formation of the Airbus Industrie Today's Airbus is the product of international consolidation in the European aerospace industry tracing way before the formation of the Airbus Industrie GIE consortium in 1970. In addition to other subsidiaries pertaining to security and space activities, EADS owned 100% of the pre-

existing Eurocopter SA, established in 1992, as well as 80% of Airbus Industrie GIE. In 2001, Airbus Industrie GIE was reorganised as Airbus SAS, a simplified joint-stock company 53393997bf

List of accidents and incidents involving the Airbus A320 family The following is a list of accidents and incidents involving the Airbus A320 family and A320neo family of jet airliners. As of March 2024, 180 aviation accidents and incidents have occurred, including 38 hull-loss accidents, resulting in a total of 1490 fatalities. As of March 2024[update], 180 The following is a list of accidents and incidents involving the Airbus A320 family and A320neo family of jet airliners 53393997bf

Airbus Defence and Space Formed in 2014 in the restructuring of European Aeronautic Defence and Space (EADS), Airbus SE comprises Airbus Defence and Space is a division of Airbus SE. Contributing 21% of Airbus revenues in 2016, it is the second largest space company in the world. Formed in 2014 in the restructuring of European Aeronautic Defence and Space (EADS), Airbus SE comprises the former Airbus Military, Astrium, and Cassidian divisions. Airbus Defence and Space is a division of Airbus SE 53393997bf

The initial A350 design proposed in 2004, in response to the Boeing 787 Dreamliner, would have been a development of the Airbus A330 with composite wings, advanced winglets, and new efficient engines. 53393997bf

Airbus A350 The Airbus A350 is a long-range, wide-body twin-engine airliner developed and produced by Airbus. The initial A350 design proposed in 2004, in response The Airbus A350 is a long-range, wide-body twin-engine airliner developed and produced by Airbus 53393997bf

Due to inadequate market support, Airbus switched in 2006 to a clean-sheet "XWB" (eXtra Wide Body) design, powered by two Rolls-Royce Trent XWB high bypass turbofan engines. The prototype first flew on 14 June 2013 from Toulouse, France. Type certification from the European Aviation Safety Agency (EASA)

was obtained in September 2014, followed by certification from the Federal Aviation Administration (FAA) two months later. 53393997bf

Eurocopter EC225 Super Puma It is a twin-engined aircraft and can carry up to 24 passengers along with two crew and a cabin attendant, dependent on customer configuration. The Airbus Helicopters H225 (formerly Eurocopter EC225 Super Puma) is a long-range passenger transport helicopter developed by Eurocopter as the next generation The Airbus Helicopters H225 (formerly Eurocopter EC225 Super Puma) is a long-range passenger transport helicopter developed by Eurocopter as the next generation of the civilian Super Puma family. The helicopter is marketed for offshore support and VIP passenger transport duties, as well as public service missions 53393997bf

Narrow-body aircraft narrow-body aircraft, such as the Boeing 737 Classic, McDonnell-Douglas MD-80 and Airbus A320 were primarily employed in short to medium-haul markets requiring neither A narrow-body aircraft or single-aisle aircraft is an airliner arranged along a single aisle, permitting up to 6-abreast seating in a cabin less than 4 metres (13 ft) in width 53393997bf

Airbus A220 It was originally developed by Bombardier Aviation and had two years in service as the Bombardier CSeries. It was originally developed by Bombardier The Airbus A220 is a family of five-abreast narrow-body airliners by Airbus Canada Limited Partnership (ACLP). The Airbus A220 is a family of five-abreast narrow-body airliners by Airbus Canada Limited Partnership (ACLP) 53393997bf

Keeping the eight-abreast economy cross-section of the A300, the early A340-200/300 has a similar airframe to... 53393997bf Through to 2015, the Airbus A320 family has experienced 0.12 fatal hull-loss accidents for every million takeoffs, and 0.26 total hull-loss accidents for every million takeoffs; one of the lowest fatality rates of any airliner. 53393997bf The program was launched on 13 July 2008. The smaller A220-100 (formerly CS100) first flew on 16 September 2013, received an initial type certificate from

Transport Canada on 18 December 2015, and entered service on 15 July 2016 with launch operator Swiss Global Air Lines. The longer A220-300 (formerly CS300) first flew on 27 February 2015, received an initial type certificate on 11 July 2016, and entered service with airBaltic on 14 December 2016. Both launch operators recorded better-than-expected fuel burn and dispatch reliability, as well as positive feedback from passengers... 53393997bf The A350 is the first Airbus aircraft largely made of carbon-fibre-reinforced... 53393997bf In the mid-1970s, Airbus conceived several derivatives of the A300, its first airliner, and developed the A340 quadjet in parallel with the A330 twinjet. In June 1987, Airbus launched both designs with their first orders and the A340-300 took its maiden flight on 25 October 1991. It was certified along with the A340-200 on 22 December 1992 and both versions entered service in March 1993 with launch customers Lufthansa and Air France. The larger A340-500/600 were launched on 8 December 1997; the A340-600 flew for the first time on 23 April 2001 and entered service on 1 August 2002. 53393997bf In contrast, a wide-body aircraft is a larger airliner usually configured with multiple aisles and a fuselage diameter of more than 5 metres (16 ft), allowing at least seven-abreast seating and often more travel classes. 53393997bf The civil-orientated EC225 has a military counterpart, which was originally designated as the Eurocopter EC725. In 2015, the EC225 was formally renamed H225, and the EC725 as H225M, in line with Eurocopter's corporate rebranding as Airbus Helicopters. 53393997bf Airbus studies started in 1988, and the project was announced in 1990 to challenge the dominance of the Boeing 747 in the long-haul market. The then-designated A3XX project was presented in 1994 and Airbus launched the €9.5-billion (\$10.7-billion) A380 programme on 19 December 2000. The first prototype was unveiled in Toulouse, France on 18 January 2005, commencing its first flight on 27 April 2005. It then obtained its type certificate from the European Aviation Safety Agency (EASA) and the US Federal Aviation Administration (FAA) on 12 December 2006. 53393997bf
