General relativity The relation is specified by the Einstein field equations, a system of second-order partial differential equations. General Relativity Tutorials by John Baez General relativity, also known as the general theory of relativity, and as Einstein's theory of gravity, is the geometric theory of gravitation published by Albert Einstein in 1915 and is the accepted description of gravitation in modern physics. Series of lectures on General Relativity given in 2006 at the Institut Henri Poincaré (introductory/advanced). In particular, the curvature of spacetime is directly related to the energy, momentum and stress of whatever is present, including matter and radiation. General relativity generalizes special relativity and refines Newton's law of universal gravitation, providing a unified description of gravity as a geometric property of space and time, or four-dimensional spacetime

 debate as to what extent the United States was caught off guard, and
 how much and when American officials knew of Japanese plans for an

 the United States and the United Kingdom knew of the attack in
