History of radiation protection The Radiation Protection Ordinance sets dose limits for the general population and for occupationally exposed persons. As a result, the study of radiation damage also became a part of this history. In general, any use of ionizing radiation The history of radiation protection begins at the turn of the 19th and 20th centuries with the realization that ionizing radiation from natural and artificial sources can have harmful effects on living organisms

SOAP note The SOAP note (an acronym for subjective, objective, assessment, and plan) is a method of documentation employed by healthcare providers to write out The SOAP note (an acronym for subjective, objective, assessment, and plan) is a method of documentation employed by healthcare providers to write out notes in a patient's chart, along with other common formats, such as the admission note. Additionally, it serves as a general cognitive framework for physicians to follow as they assess their patients. Documenting patient encounters in the medical record is an integral part of practice workflow starting with appointment scheduling, patient check-in and exam, documentation of notes, check-out, rescheduling, and medical billing
