Electrotherapy (cosmetic) ". Khandpur, Handbook of Biomedical Instrumentation, 2nd Ed. and Body Electrotherapy Treatments" (page 132) R. In rehabilitation medicine, electrotherapy has been widely utilized and studied; however, its use on healthy muscles, particularly in cosmetic and non-clinical settings, remains controversial. S. , Publisher Tata McGraw-Hill Education, 2003 Cosmetic electrotherapy is a range of beauty treatments that uses low electric currents passed through the skin to produce several therapeutic effects such as muscle toning in the body and micro-lifting of the face. Some studies have questioned its effectiveness in these contexts, citing a lack of sufficient scientific evidence to support its claimed benefits e9ecbfd8d1

Biomedical equipment technician Khandpur, R. , Clinical Engineering Handbook (Biomedical Engineering). "Biomedical Instrumentation: A biomedical engineering/equipment technician/technologist ('BMET') or biomedical engineering/equipment specialist (BES or BMES) is typically an electro-mechanical technician or technologist who ensures that medical equipment is well-maintained, properly configured, and safely functional. S. In healthcare environments, BMETs often work with or officiate as a biomedical and/or clinical engineer, since the career field has no legal distinction between engineers and engineering technicians/technologists. Centrifugation Compendium of Biomedical Instrumentation, 3 Volume Set. Publishers. Khandpur, Raghbir Singh (25 February 2020). ISBN 978-1-85996-037-0. Chemists and biologists may increase the effective gravitational force of the test tube so that the precipitate (pellet) will travel quickly and fully to the bottom of the tube. The denser components of the mixture migrate away from the axis of the centrifuge, while the less dense components of the mixture migrate towards the axis. The remaining liquid that lies above the precipitate is called a supernatant or supernate. John Wiley & Sons Centrifugation is a mechanical process which involves the use of the centrifugal force to separate particles from a solution according to their size, shape, density, medium viscosity and rotor speed e9ecbfd8d1
