Internet linguistics Since the beginning of human-computer interaction (HCI)
 leading to computer-mediated communication (CMC) and Internet-mediated
 communication (IMC), experts, such as Gretchen McCulloch have
 acknowledged that linguistics has a contributing role in it, in terms of web
 interface and usability. It studies new language styles and forms that have
 arisen under the influence of the Internet and of other new media, such as
 Short Message Service (SMS) text messaging. Lexical statistics have been

gathered for resolving prepositional phrase attachments, while Web document were used to seek a balance in the Internet linguistics is a domain of linguistics advocated by the English linguist David Crystal. Such study aims to benefit both linguists and web users combined. Studying the emerging language on the Internet can help improve conceptual organization, translation and web usability. sparseness 861306377d

861306377d This page contains discussions that have been archived from
Village pump (technical). Please do not edit the contents of this page. If you
wish to revive any of these discussions, either start a new thread or use the
talk page associated with that topic. 861306377d For example, advocates of
gender-neutral language challenge the traditional use of masculine nouns and
pronouns (e.g. "man" and "he") when referring to two or more genders or to a
person of an unknown gender in most Indo-European and Afro-Asiatic
languages. This stance is often inspired by feminist ideas about gender
equality. Gender neutrality is also used colloquially when one wishes to be
inclusive of people who identify as non-binary genders or as genderless.
