I can log in to Wikipedia but when using the same credentials, trying to log in to Wikimedia, it shows that they are incorrect. I requested a password reset but no email has arrived in my inbox (I've checked the spam folder). What's even stranger is that recently sometimes I was able to log in to Wikimedia (it's like I successfully log in in 20% of cases and I fail in the remaining 80% of cases). Using the same creds, I also successfully logged in to Wikispecies. Regarding Wiktionary, Wikisource & Wikiversity, for each of them, I was logged out, accessing a given project, than I clicked the "Log in" link at the top right corner, I clicked the login input and I became automatically logged in without typing anything. I have no idea how these accounts work and why there's no one single account so after logging in to any of the Wikimedia projects, I would be automatically logged in into any other project as well (of course I mean only the projects run by Wikimedia Foundation, without any 3-rd party wikis like Uncyclopedia or Ballotpedia). Global economic recovery accelerated during the latter half of the decade, fueled by strong economic growth in many countries, robust consumer spending, increased investment in infrastructure, and the emergence of new technologies. However, the recovery developed unevenly. Socioeconomic crises in some countries—particularly in the Arab world—triggered political revolutions in Tunisia, Egypt, and Bahrain as well as civil wars in Libya, Syria, and Yemen in a regional phenomenon that was commonly referred to as the Arab Spring. Meanwhile, Europe had to grapple with a debt crisis that was pronounced early in the decade. Shifting social attitudes saw LGBT rights make substantial progress throughout the decade, particularly in developed countries. 550e8bed0b
